our amazing contribution to Foodscap dinner on 11/21/2020 at 17 CET. It was the first online party I had ever joined. It was held in our studio design room (Karin's Private room). I have to confess I did not expect it to be so funny and interesting like it was. It was so nice to have my professor, tutors and colleagues in one screen together that I wish to have the chance to see them all in person ASAP. It was a party with various concepts such as food, make up, background design and also music. All students did their best to attend in such funny gathering in many creative ways. Then we had a number of winners provided by a guided tour through BCN by a Private guide. I experienced a combination of feelings at this night like excitement, happiness and encourage. And now it is time to cheer for having more and more parties like this together. but ... in person and without the pandemic!
